

Fountain Greens

Fountain Greens was conceived as an alternative housing solution for empty nester and entry level buyers whose choices are often limited and uninspired due to a fixed or moderate income. Inexpensive design details were employed to add interest and value. Trellises are used throughout the village to create visual interest and shadow patterns. Color, another inexpensive design element, reinforces the festive character of the community. A balance of traditional materials and contemporary forms is resolved in architecture that celebrates simplicity and value.

Client
Fountain Greens, LLC

Location
