

Gateway Canyons

Gateway Canyons Resort adds 26 upscale hotel rooms with the addition of the Kayenta Lodge. An architectural character inspired by the unique landscape of southwestern Colorado complements the rich native history. In addition, the Casitas will provide private accommodations for high end guests.

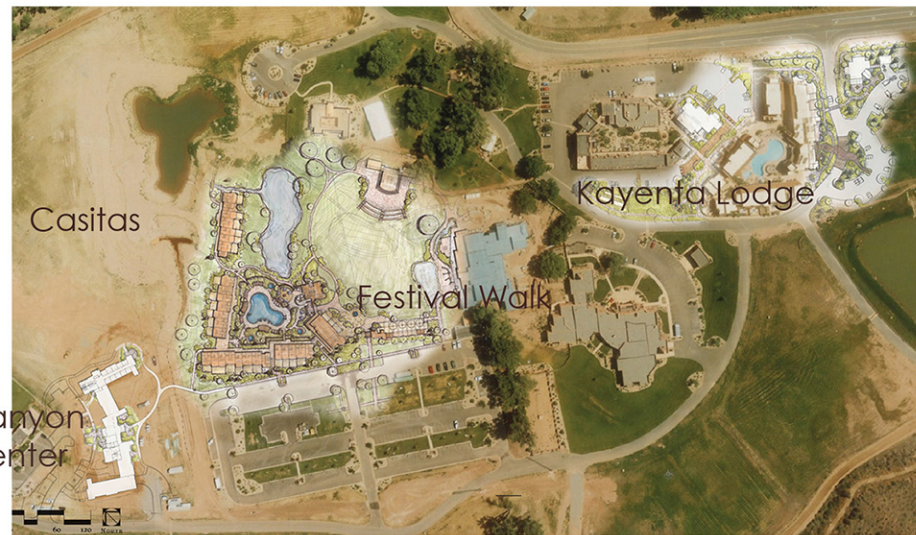

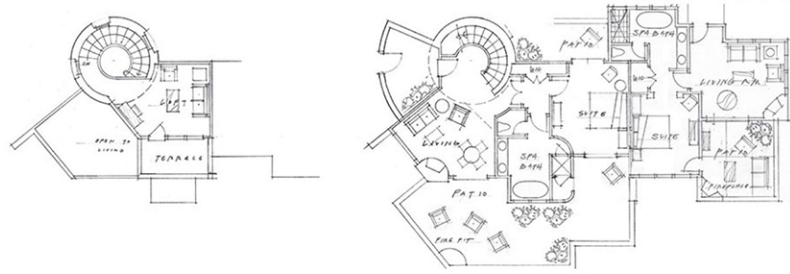

The Festival Walk provides covered, open air spaces for artisans to display their work for guests and concert goers attending performances at the Mission Bell Amphitheater.

The Canyon Center adds administrative offices, a car showroom and accommodations for visiting lecturers and professors.
