

Custom Residence at Red Ledges

Designed for empty nesters with an eye to the future, this home of 6,050 square feet balances privacy and function for multiple generations.

The glass wall of the great room captures mountain views and complements the massive stone fireplace as the unique kitchen places secondary uses in a walk through pantry. A spa bath suite with fireplace and sauna support the master bedroom and an adjacent office provides workspace for two. A fully contained guest suite "bookends" the master.

The upper level provides two guest suites accessed by the grand hall stair. The lower level contains the theater, snack kitchen and kids bunkroom for rambunctious adventure well out of earshot of the main level.
