

Vila di Lago

Steep topography and a championship golf course were the major influences for the design of Vila di Lago. Responding with a terraced solution, the design "steps" up the hill to settle the homes into the land and create a European inspired hill town. A gatehouse establishes the design character for the community with stone and stucco elements that continue the aesthetic throughout.

This work represents previous experience completed as Director of Residential Architecture for DTJ Design, Inc.

Client
Amland Development

Location
Las Vegas, Nevada
